1st International Symposium on Flash Floods in Wadi Systems
Disaster Risk Reduction and Water Harvesting in the Arab Region

14th – 15th of October 2015
Obaku Plaza, Kyoto University, Gokasho, Uji, Kyoto, Japan

Supported by:
Global Alliance of Disaster Research Institutes (GADRI)
&
Water Resources Research Center (WRRC)
Disaster Prevention Research Institute (DPRI)
Kyoto University
Symposium Statement

The second Global Summit of Research Institutes for Disaster Risk Reduction in March 2015 has strongly recommended development of a research road map for the next decade. Based on an agreement of all participants, Global Alliance of Disaster Research Institutes (GADRI) has been established. Through the discussion, the atmospheric and water related disaster and integrated disaster risk management groups agreed to establish a network of international research groups to investigate flash floods disasters, and implement new research methodologies, and emphasizing transdisciplinary approaches. The first international symposium on flash floods in Wadi system focus on the Disaster Risk Reduction (DRR) by discussing current mitigation measures for protection against flash floods in arid and semi-arid regions, and consequent wise use of floodwater (water harvesting) in Wadi systems.

The topic of integrated flash flood management is discussed on several fronts: flood protection, hydrological modelling, water harvesting, social implications, future development of Wadi’s, integrated risk management, sedimentation in reservoirs, water resources management and dam constructions. Global Alliance of Disaster Research Institutes (GADRI) aims at strengthening collaboration and exchanging in research with other international institutes and researchers. Flash flood problems in arid and semi-arid regions can be listed up one of target issues for such collaboration. It is hoped that introducing Japanese technologies provide an innovative way in integrated flash flood protection and harvesting.

There are twenty-two Arab countries with a total population of 420 million. The Arab region is located in arid and semi-arid zones. The climate is characterized by hot dry summers, moderate winters, and very little rainfall. Rapid increase of population and urbanization has pushed people to high disaster risk zones such as on unstable hills and Wadi’s flood plain located in Saudi Arabia, Egypt and Yemen. In these countries overlooking the red sea, the climate change has a great impact on the frequency and intensity of extreme weather events. High variations of rainfall with an increase in flood events affect the Arab region. Recently, severe flash floods hit several mountainous in the Wadi’s plain leaving more than 100 people in fatality.
In January 2010, and February and April 2011 several areas within the Wadi’s plains in Egypt including Aswan, Luxor, Assiut, and Sinai Peninsula were impacted by flash flood. Records of severe flash floods from 2008 to 2009 in Saudi Arabia and Yemen indicated an estimated total damage of approximately 1.3 billion USD (UNISDR-ROAS, March 2013). Continued heavy rains and consequent flash floods from early August 2013 across Sudan caused extensive damage and loss of life in fifteen states, with Khartoum, Gezira, Blue Nile, River Nile, White Nile and Northern state being the most affected. The Government estimates that 114,000 households have been affected with at least 110 people injured and 14 people killed. A total of 40,000 houses have been completely destroyed, displacing a large part of the affected population.

Egypt is fairly unique in the distribution of its population, land-use and agriculture, and economic activity which makes it extremely vulnerable to any potential impacts on its water resources and coastal zones. Despite being a large squarely shaped country with an area of about a million square kilometer, its lifeline is constrained along a narrow T-shaped strip of land (which constitutes less than 5% of its total land area). This is extends along the Nile River and the northern coast around the Nile delta. However, the combination of population growth, economic development and climate change pose to reduce the available water per capita in the region and shift the dynamics of power in the basin. The technical program consists of the following seven sessions. The final closing discussion will discuss the road map for future collaboration within the scope of the proposed project as one of important topics of GADRI network.

Disaster Risk Reduction & Water Harvesting in the Arab Region
14-15 October 2015
Themes of the Symposium

1- Case Studies of Flash Flood Management

2- Wadi’s Future Developments Projects and Integrated Water Management

3- Hydrological Modelling and Climate Change Impacts

4- Flood Mitigation and Water Harvesting Strategies

5- Innovative Technologies

6- Integrated Risk Management I

7- Integrated Risk Management II

8- Summary and Closing Discussion
Speakers

Japan: Prof. Dr. Kaoru Takara, Director, DPRI, Kyoto University
Japan: Prof. Dr. Hirokazu Tatano, DPRI, Kyoto University
Japan: Prof. Dr. Tetsuya Sumi, DPRI, Kyoto University
Japan: Prof. Dr. Ana Maria Cruz, DPRI, Kyoto University
Japan: Associate Prof. Dr. Muneta Yokomatsu, DPRI, Kyoto University
Japan: Associate Prof. Sameh Kantoush, DPRI, Kyoto University
Japan: Associate Prof. Dr. Koichi Unami, Graduate School of Agriculture, Kyoto University
Japan: Dr. Subhajyoti Samaddar, DPRI, Kyoto University
Japan: Mr. Mohamed Abdelfatah, Ph.D. Student, DPRI, Kyoto University
Japan: Dr. Takuji Kubota, Japan Aerospace Exploration Agency (JAXA)
Japan: Mr. Yoichi Iwami, Chief Researcher, ICHARM
Japan: Mr. Hitoshi Yoshida, Japan Dam Engineering Center (JDEC)
Japan: MLIT Representative, MLIT
Egypt: Ambassador Hesham El-Zemeity (Ambassador of A.R.E.)
Egypt: Prof. Dr. Ahmad Wagdy, Vice Dean for Graduate Studies, Faculty of Engineering, Cairo University
Egypt: Prof. Dr. Karima Attia, Director of Water Resources Research Institute, National Water Research Center (NWRC)
Egypt: Prof. Dr. Mohamed EL-Bastawesy, National Authority for Remote Sensing
Egypt: Dr. Mohamed Al-Aawah, Programme Specialist, UNESCO- Cairo.
Egypt: Associate Prof. Dr. Eman Hassan, Water Resources Research Institute, National Water Research Center (NWRC)
Jordan: Associate Prof. Dr. Osama Mohawesh, Guest Scholar, Kyoto University and Water Resources and Environmental Engineering, Mutah University
Saudi Arabia: Associate Prof. Dr. Khalid A. Al-Ghamdi, Umm Al Qura University, Mecca
Sudan: Prof. Dr. Abdalla Abdelsalam Ahmed, Director General, UNESCO Chair.
Oman: Eng. Ahmed Al Barwani, Ministry of Regional Municipalities and Water Resources
Oman: Dr. Saif Al Hinai, Water Management Systems, Special Economic Zone Authority.
Europe: Associate Prof. Dr. Ir. Biswa Bhattacharya, UNESCO-IHE, Delft, The Netherlands
Europe: Prof. Dr. Uwe Tröger, TUB, Berlin, Germany
Europe: Dr. Mohammad Meshkati Shahmirzadi, Antea Group, Antwerpen, Belgium
Europe: Associate Prof. Dr. Gabriele Landucci, University of Pisa, Italy
Europe: Dr. Junko Mochizuki, International Institute for Applied Systems Analysis, Austria
# Program

## First Day Program: 14th October (Wednesday), 2015 at KIHADA Hall

**9:00-10:00  Registration**

**Opening Session:** Chaired by: Prof. Shigenobu Tanaka (Kyoto University, Japan)

<table>
<thead>
<tr>
<th>Time</th>
<th>Title of presentation</th>
<th>Presenter</th>
</tr>
</thead>
<tbody>
<tr>
<td>10:00 – 10:05</td>
<td>Opening Remarks and Guest Welcome</td>
<td><strong>Prof. Kaoru Takara</strong> (Director, DPRI, Kyoto University, Japan)</td>
</tr>
<tr>
<td>10:15 – 10:20</td>
<td>Vision and Interest of MLIT for Flash Floods Disaster in the Arab Region</td>
<td><strong>MLIT Representative</strong></td>
</tr>
<tr>
<td>10:20 – 10:25</td>
<td>Urgent Capacity Development for Managing Natural Disaster Risks of Flash Floods in Egypt, Jordan, Sudan and Yemen</td>
<td><strong>Dr. Mohamed Al-Aawah</strong> (UNESCO- Cairo, Egypt)</td>
</tr>
<tr>
<td>10:25 – 10:30</td>
<td>Symposium Program, Statement and General Vision</td>
<td><strong>Prof. Tetsuya Sumi</strong> (Kyoto University, Japan)</td>
</tr>
<tr>
<td>10:30 – 10:40</td>
<td><strong>Group Photo at “KIHADA Hall”</strong></td>
<td></td>
</tr>
<tr>
<td>10:40 – 11:00</td>
<td><strong>Coffee Break</strong></td>
<td></td>
</tr>
</tbody>
</table>
### Session 1: Case Studies of Flash Floods Management

**Chaired by: Associate Prof. Sameh Kantoush (Kyoto University, Japan)**

**Note:** Allocated time for Oral Presentations: 20 min. talk + 5 min. discussion

<table>
<thead>
<tr>
<th>Time</th>
<th>Presentation</th>
<th>Speaker/Institution</th>
</tr>
</thead>
<tbody>
<tr>
<td>11:00 – 11:25</td>
<td>Flash Floods in Egypt: Strategies, Measures, and Harvesting</td>
<td>Prof. Karima Attia (National Water Research Center, Egypt)</td>

<td>Managing Groundwater Recharge and Recovery, as Reuse Method: a Chance for Egypt's Water Supply</td>
<td><strong>Prof. Uwe Tröger</strong> (TUB, Germany)</td>
</tr>
<tr>
<td>15:40 – 16:05</td>
<td>Using Remote Sensing and GIS For Estimating the Flash Flood Parameters for the Dryland Catchments: Implication for Water Resources Management</td>
<td><strong>Associate Prof. Mohamed EL-Bastawesy</strong> (National Authority for Remote Sensing and Space Sciences, Egypt)</td>
</tr>
<tr>
<td>16:05 – 16:30</td>
<td>Establishing a Saudi Arabia Land Data Assimilation System for Proper Water Resources Management</td>
<td><strong>Associate Prof. Khalid A. Al-Ghamdi</strong> (Umm Al-Qura University, Kingdom of Saudi Arabia)</td>
</tr>
</tbody>
</table>

16:30 – 16:50 **Coffee Break**

### Session 4: Innovative Technologies

*Chaired by: Associate Prof. Tetsuo Tobita (Kyoto University, Japan)*

**Note:** Allocated time for Oral Presentations: 20 min. talk + 5 min. discussion

<table>

<td>17:15 – 17:40</td>
<td>A Case Study on Flood Forecasting Applicable to Insufficient Observation Areas</td>
<td><strong>Mr. Yoichi Iwami</strong> (Public Works Research Institute, Japan)</td>
</tr>
<tr>
<td>17:40 – 18:05</td>
<td>Operational Flash Flood Forecasting, Warning System and Management for Sinai Peninsula, Egypt</td>
<td><strong>Dr. Mohammad Meshkati Shahmirzadi</strong> (Antea Group, Belgium)</td>
</tr>
</tbody>
</table>

18:30 – 20:00 Dinner Reception (In the Hybrid Space - Second Floor of Obaku Plaza)

*Associate Prof. Yasuhiro Takemon* (Kyoto University, Japan)
Second Day Program: 15th October (Thursday) 2015 at KIHADA Hall

8:30-9:00  Registration

Session 5: Hydrological Modelling and Climate Change Impacts
Chaired by: Prof. Tomoharu Hori (Kyoto University, Japan)

Note: Allocated time for Oral Presentations: 20 min. talk + 5 min. discussion

9:00 – 9:25  On Bayesian Probabilistic Flash Flood Guidance
Prof. Biswa Bhattacharya
(UNESCO-IHE, Netherlands)

9:25 – 9:50  Rainfall Observation from Space: Global Satellite Mapping of Precipitation (GSMaP)
Dr. Takuji Kubota
(Japan Aerospace Exploration Agency, Japan)

9:50 – 10:15  A Stochastic Model for Occurrence of Flash Flood Events in a Wadi of the Jordan Rift Valley
Associate Prof. Koichi Unami
(Kyoto University, Japan)

10:15 – 10:40  Hydrological Modeling and Early Warning System in Egypt
Associate Prof. Eman Hassan
(National Water Research Center, Egypt)

10:40 – 11:05  Hydrological Modelling of Flash Flood to Assess the Distributed Mitigation Structures in Wadi Abadi Case Study of the Eastern Desert in Egypt
Mr. Mohammed Abdel-Fattah
(Kyoto University, Japan)

11:05 – 11:25  Coffee Break

Session 6: Integrated Disaster Risk Management I
Chaired by: Associate Prof. Kazuyoshi Nishijima (Kyoto University, Japan)

Note: Allocated time for Oral Presentations: 20 min. talk + 5 min. discussion

11:25 – 11:50  Joint Natural and Technological Disasters: an Emerging Risk Issue
Prof. Ana Maria Cruz
(Kyoto University, Japan)

11:50 – 12:15  Quantitative Assessment of Risk Due to NaTech (Joint Natural and Technological Hazards) Scenarios Caused by Floods
Associate Prof. Gabriele Landucci
(University of Pisa, Italy)

12:15 – 12:40  What Does Integrated Disaster Risk Management Mean? From the Planning Perspective of Disaster Risk Reduction
Prof. Hirokazu Tatano
(Kyoto University, Japan)
12:40 – 13:40  Lunch Break

Session 7: Integrated Disaster Risk Management II

Chaired by: Prof. Hirokazu Tatano (Kyoto University, Japan)

Note: Allocated time for Oral Presentations : 20 min. talk + 5 min. discussion

13:40 – 14:05  An Economic Growth Model for Flood Risk Reduction with a Focus on Human Capital  
Associate Prof. Dr. Muneta Yokomatsu (Kyoto University, Japan)

14:05 – 14:30  From Risk Information to Policy Options- Understanding Scales, Contexts and Perspectives to Inform Global and Local Options for Disaster Risk Management  
Dr. Junko Mochizuki (International Institute for Applied Systems Analysis, Austria)

Dr. Subhajyoti Samaddar (Kyoto University, Japan)

14:55 – 15:15  Coffee Break

Session 8: Panel Discussion/ Closing Discussions / GADRI / Future Plans (all)

Moderator: Associate Prof. Sameh Kantoush (Kyoto University, Japan)

Prof. Hirokazu Tatano (Kyoto University, Japan)

15:25 – 15:45  Summaries and Outcomes of Flash Flood Symposium in Kyoto  
Associate Prof. Sameh Kantoush (Kyoto University, Japan)

15:45 – 17:30  Plenary Discussion for Future Research Collaboration  
All participants
## Index

### Session 1: Case Studies of Flash Floods Management

**Flash Floods in Egypt: Strategies, Measures, and Harvesting**

エジプトにおけるフラッシュフラッド: 計画、対策手法、水資源利用  
Karima Attia (National Water Research Center, Egypt)  
1

**Flash Floods Mitigation and Harvesting Case Study of Oman**

オマーンにおけるフラッシュフラッドの被害軽減と水資源利用  
Ahmed Said Al Barwani  
(Ministry of Regional Municipalities and Water Resources, Oman)  
11

**Flash Floods in Arid and Semi-arid Region: Overview of Sudan Experience**

乾燥・半乾燥地域におけるフラッシュフラッド: スーダンでの経験  
Abdalla Abdelsalam Ahmed (UNESCO Chair, Sudan)  
21

### Session 2: Wadi’s Future Developments Projects & Integrated Water Management

**Integrated Strategies for Management of Flash Floods in the Arabian Wadi Basins**

アラブ諸国のワジ谷におけるフラッシュフラッド管理のための総合計画  
Sameh Kanoush (Kyoto University, Japan)  
31

**Integrated Water Management Strategy in Duqm Area, Sultanate of Oman**

オマーン王国・ドゥクムにおける総合水管理計画  
Saif Alhinai (Special Economic Zone Authority at Duqm, Oman)  
39

**Tangible and Potential Risks of Flash Floods in the Hashemite Kingdom of Jordan**

ヨルダン・ハシミテ王国におけるフラッシュフラッドの顕在的と潜在的リスク  
Osama Mohawesh (Mutah University, Jordan / Guest Scholar, Kyoto University)  
53

### Session 3: Flood Mitigation & Water Harvesting Techniques

**Developing Groundwater Resources in Arid Lands: the Eastern Desert Project - EDP**

乾燥地における地下水資源の開発: 東部砂漠プロジェクト  
Ahmed Wagdy (Cairo University, Egypt)  
61

**Managing Groundwater Recharge and Recovery, as Reuse Method: a Chance for Egypt's Water Supply and Other Arid and Semiarid Countries**

水再利用の手段としての地下水涵養の管理: エジプトの水供給と他の乾燥・半乾燥国におけるチャンス  
Uwe Tröger (TUB, Germany)  
75
乾燥地集水域におけるリモートセンシングと GIS を用いたフラッシュフラッド特性の推定: 水資源管理への提示
Mohamed EL-Bastawesy (National Authority for Remote Sensing, Egypt) 83

Establishing a Saudi Arabia Land Data Assimilation System for Proper Water Resources Management
適切な水資源管理に向けたサウジアラビア土地データ同化システムの構築
Khalid A. Al-Ghamdi (Umm Al-Qura University, Kingdom of Saudi Arabia) 89

Session 4: Innovative Technologies
Feasibility Study on Application of Trapezoidal CSG Dam for Flash Flood Mitigation Measures
フラッシュフラッド対策としての台形 CSG ダムの適用可能性調査
Hitoshi Yoshida (Japan Dam Engineering Center, Japan) 97

A Case Study on Flood Forecasting Applicable to Insufficient Observation Areas
観測データの不十分な地域に適用可能な洪水予測手法に関する事例研究
Yoichi Iwami (Public Works Research Institute, Japan) 103

Operational Flash Flood Forecasting, Warning System and Management for Sinai Peninsula, Egypt
エジプト・シナイ半島の運用的なフラッシュフラッドの予測、警戒システム、管理
Mohammad Meshkati Shahmirzadi (Antea Group, Belgium) 111

Session 5: Hydrological Modelling & Climate Change Impacts
On Bayesian Probabilistic Flash Flood Guidance
ベイズ確率によるフラッシュフラッドのガイドダンス
Biswa Bhattacharya (UNESCO-IHE, Netherlands) 115

Rainfall Observation from Space: Global Satellite Mapping of Precipitation (GSMaP)
宇宙からの降雨観測: Global Satellite Mapping of Precipitation (GSMaP)
Takuji Kubota (Japan Aerospace Exploration Agency, Japan) 121

A Stochastic Model for Occurrence of Flash Flood Events in a Wadi of the Jordan Rift Valley
ヨルダンのワジにおける鉄砲洪水事象の発生に対する確率論的モデル
Koichi Unami (Kyoto University, Japan) 127
Hydrological Modelling and Early Warning System in Egypt
エジプトにおける水文モデリングと早期警戒システム
Eman Hassan (National Water Research Center, Egypt) 133

Hydrological Modelling of Flash Flood to Assess the Distributed Mitigation Structures in Wadi Abadi Case Study of the Eastern Desert in Egypt
エジプト東部砂漠のワジにおけるフラッシュフラッドの水文モデルと分布型減災構造物の評価
Mohammed Abdel-Fattah (Kyoto University, Japan) 141

Session 6: Integrated Disaster Risk Management I
自然災害と産業事故の複合災害: 新たなリスク
Ana Maria Cruz (Kyoto University, Japan) 147

Quantitative Assessment of Risk Due to NaTech (Joint Natural and Technological Hazards) Scenarios Caused by Floods
水害がトリガーとなるNatech（自然災害と産業事故の複合災害）リスクの定量的評価
Gabriele Landucci (University of Pisa, Italy) 153

What Does Integrated Disaster Risk Management Mean? From the Planning Perspective of Disaster Risk Reduction
総合防災とは何か?: 災害リスク軽減のための計画論の視点から
Hirokazu Tatano (Kyoto University, Japan) 161

Session 7: Integrated Disaster Risk Management II
経済成長モデルによる水害リスク対策の評価：人的資本形成過程に着目して
Muneta Yokomatsu (Kyoto University, Japan) 165

From Risk Information to Policy Options: Understanding Scales, Contexts and Perspectives to Inform Global and Local Options for Disaster Risk Management
リスク情報を利用した政策オプションの共創: 異なる問題背景・認識を反映したグローバル・地域スケールでの災害管理オプションの提唱
Junko Mochizuki (International Institute for Applied Systems Analysis, Austria) 177

What Constitutes a Successful Participatory Disaster Risk Management?
参加型災害リスクマネジメントが結実するためには何が必要か？ガーナでの経験から
Subhajyoti Samaddar (Kyoto University, Japan) 183
